The Threat: Administration Tactics to Subvert the Vote

- Casting doubt on election integrity via disinformation to justify nationalizing elections
- Weaponizing the federal government by installing election deniers in key government positions
- Gutting key agencies and essential election security programs
- Weaponizing federal databases and demanding personal voter information from states to track or purge voters
- Issuing unconstitutional executive orders to limit voting access
- Pressuring Congress to pass legislation that would suppress eligible voters
- Curtailing voting by mail
- Preventing states from using voting equipment
- Diluting voters' power through a mid-decade gerrymandering crisis
- Using the departments of Justice and Homeland Security to intimidate election administrators
- Seizing election-related materials and voting equipment
- Deploying the military to interfere with the election
- Deploying federal agents to interfere with the election
- Declaring a national emergency to take over or postpone elections
- Interfering with issuance of state election certificates or pressuring the U.S. Senate or House of Representatives to block seating of duly elected members

The Enemy is...

Despair!

Our Allies are...

Everywhere!

The Peoples's Election Playbook

*To hold on to power, they are going to try to keep people from voting. **We are not going to let them.** These actions are foundations that other tactics build on to stop them.*
